PHASE IV DEBRIS REMOVAL SURVEY
Preliminary Environmental Unit Review

Waterway: 8348 Buras Boat Harbor

NOAA reviewer: Jordan Stout

Date: 17SEP2008

Checklist of Environmental Factors – Assess the potential for impacts to the following resources/areas and coordinate as necessary:

- [x] Habitat/environmental sensitivity
  Restrict survey to waterway. Do not cause physical damage to wetland shorelines.
- [ ] Threatened/endangered species
- [ ] Cultural/historical resources
- [x] Oyster habitat
  An oyster lease area occurs outside of the boat harbor and the west (directly across from the boat harbor's main finger piers).
- [ ] State/federal/tribal lands
- [ ] Scenic waterway

Summary and Conclusions of Environmental Review:

Habitat/environmental sensitivity: ESI map indicates that salt marsh habitat dominates the west side of the subject waterway.

Threatened/endangered species: ESI maps do not indicate the presence of any Federally-designated Threatened or Endangered species.

Cultural/historical resources: No known resources at this time.

Oyster habitat: An oyster lease area occurs outside of the boat harbor and the west (directly across from the boat harbor's main finger piers). Additional lease areas exist offshore of the boat harbor and to the Southwest. Care must be taken with any removal activities to the west of the boat harbor to ensure they do not impact nearby oyster lease areas.

State/federal/tribal lands: ESI maps do not indicate any Federal, State or Tribally-managed lands along the subject waterway.

Scenic waterway: Not a scenic waterway.
