

**PHASE IV DEBRIS REMOVAL SURVEY**  
**Preliminary Environmental Unit Review**

Waterway: Butchill Outfall Canal, 8112

NOAA reviewer: Jessica White

*JW*

Date: 7/15/2008

**Checklist of Environmental Factors** – Assess the potential for impacts to the following resources/areas and coordinate as necessary:

Habitat/environmental sensitivity – waterway is surrounded by forested wetland and freshwater marsh – avoid impacting habitat

Threatened/endangered species - rare lizard may be present near waterway

Cultural/historical resources

Oyster habitat

State/federal/tribal lands

Scenic waterway

**Summary and Conclusions of Environmental Review:**

Habitat/environmental sensitivity: The waterway is surrounded by forested wetland and freshwater marsh – limit activities to open water to avoid impacts. Waterway and surrounding area may support numerous wildlife species, including egrets/herons, ducks, alligators, and water-dependent mammals (nutria, raccoons, otters). Avoid disturbing wildlife or its habitat.

Threatened/endangered species: None located in waterway, though a rare lizard may be present near the waterway (to the north). Limit activities to open water to avoid impacting lizard or its habitat.

Cultural/historical resources: No known resources at this time.

Oyster habitat: None in waterway.

State/federal/tribal lands: Waterway is not part of state/federal/tribal land.

Scenic waterway: Not a scenic waterway.
